

## Common Features Of RP CMS

Below are the common features for any website built using RP framework. It may deviate for other frameworks.

1. **A Unique Template Design** - We will not simply ready made template but design a unique template for you and convert it to HTML
2. **100% Editable CMS system** - admin can edit page contents, common contents, content images, slide show images etc through an friendly interface. Unlike other open source software you don't have to take a formal training to edit content.
3. **Admin Login System** - Admin can login, administer the full system, create new users and allow users to manage contents, SEO, orders, emails and everything else
4. **Hack Proof** - We use multiple security layers with customdata encryption rule to encrypt sensitive data. All the forms, codes are hack proof. So unlike opensource, you have no risk of being hacked. You do not need to take the trouble of upgrading periodically with security fixes.
5. **Contact form and submitted info-** An anti-spam contact form for people to contact you. A mail will go to you. This gets saved in the system and you can retrieve any time later.
6. **Sitemap page** - to make the navigation easier to the visitors
7. **Automated Sitemap XML** - You can create the sitemap.xml with a click and submit your site to google. You do not need to buy another module.
8. **SEO Module** - You can edit the SEO tags of all the front end pages through a friendly admin interface. Great value for SEO.
9. **SEO friendly URLs** - URLs are SEO friendly (using URL mod re-write ), not with IDS. The page names are created also in a SEO friendly manner with option to edit.
10. **GA Module** - You can paste the GA code only once and at one place, the system will take care of the rest.
11. **System Emails** - The system keeps all email sent history. So even if you miss an customer submission you can check it via admin system.
12. **Marketing Banner (both image and HTML)** - This is for placing your own ad banner or 3rd party ad banner.
13. **Site search (optional)** - You can opt for site search at your website at no extra cost.
14. **Mailing list CSV Download** - You can download the mailing list in a CSV of those people who has contacted you or subscribed newsletter.
15. **60 Days Warranty** - We provide 60 days warranty against any programming defects at no extra cost.
