

How_to_get_it_done

1. Contact us showing your interest. Tell us as more as possible about your requirement. If required have an online discussion through skype / gtalk.
2. We will give a fixed cost estimate if you can provide us a fixed requirement. If you give a rough requirement, we will give a ball park figure. We can write a formal requirement for you at a separate cost.
3. We agree on a price, payment schedule, hiring model, time etc.
4. We start developing the website/app in the agreed way and you pay as per agreed schedule. We take all the trouble to define, analyze, design, develop and test the application. Here is the full website app development process using RP framework.
5. You check the progress on each step and give rectification suggestion whenever required.
6. When the application development is complete and it has passed our quality testing you check it finally
7. We setup it at client server and keep a watch for few days
