

Responsive Websites

There is only one difference between a normal website and a responsive website. A normal website is optimized for specific screen resolution, screen height and screen width. Say for a 1024x768 screen. So if a visitor views this website on his tablets or mobile or any device that has a lower screen width set, he will see a horizontal scrollbar.

But a responsive website is optimized to be displayed on any screen setting. It first reads the screen setting and adjusts the website display accordingly. So you never see a horizontal scrollbar when you are viewing a responsive website. It does not really matter if you're viewing it using your android phone or using a desktop or a laptop.

How to develop a responsive website?

It is not a rocket science to develop a responsive website. It does not need to be hosted on special server, because the trick is not going to happen by the server but the PHP/HTML code script. All adjustments are done in the HTML templates and code generated HTML codes. The developer simply never hard code the width and height of anything but allows it to be moved as per screen setting.

And of course, it will take more developers time, so the cost. And you may have to compromise with the display layouts too. If you do not want to do so, you should develop two versions of your website, for mobile devices and another for desktop devices.

We test the website on computer, android and iPhone browser with different resolutions.

What does it Cost?

It takes approx 20% more time for a responsive website. The part of the websites accessed by the visitors is written with responsive HTML.

How to get it done?

1. Contact us showing your interest. Tell us as more as possible about your requirement. If required have an online discussion through skype / gtalk.
2. We will give a fixed cost estimate if you can provide us a fixed requirement. If you give a rough requirement, we will give a ball park figure. We can write a formal requirement for you at a separate cost.
3. We agree on a price, payment schedule, hiring model, time etc.
4. We start developing the website/app in the agreed way and you pay as per agreed schedule. We take all the trouble to define, analyze, design, develop and test the application. Here is the full website app development process using RP framework.
5. You check the progress on each step and give rectification suggestion whenever required.

6. When the application development is complete and it has passed our quality testing you check it finally
7. We setup it at client server and keep a watch for few days

Which Hiring Model to Use?

SL	Type of projects / tasks	Suggested-Model
1.	Small / Large Websites with ready modules	Project Based
2.	Large New Websites with some custom modules	Virtual Dedicated
3.	Downloadable / Hosted Web Application Development	Virtual Dedicated
4.	Android & iPhone Development	Project Based
5.	Maintenance of a large website / web application that requires regular and urgent changes/ fixing	Full Dedicated
6.	Maintenance of a medium sized website that requires frequent and urgent changes	Part Dedicated
7.	Maintenance of a small / medium sized website that requires small changes but not too urgent	Usage Based
8.	New feature development for a RP developed site of more than 10 hours estimate (If no dedicated developer is there)	Project Based
9	Managing multiple new projects and maintaining changes in the existing projects (required by an IT company)	Dedicated Team

Why Hire From Us?

There are solid reasons in its favour. Here are some of those

1. We **guarantee quality coding**. Any new project code developed by our developers will contain architecture based, modular, convention maintained, non redundant and future proof (easy to add new features and modify and existing feature) codes and database.
2. We will arrange for a **free pre-delivery quality review** for any application development developed by our developers - it removes the chances of common errors generally ignored by

developers

3. We provide **personalised service**. We eat that much we can chew. Because we always deliver more than you pay. So clients stay with us for years.
4. **100% assurance for future support**. We will provide support for any project done by our developers. We will not run away. We may quarrel with you on any dispute but we will never be dishonest with you.
5. You get RP ready modules and library codes just free and have **lifetime licence to use, edit on any number of domains**. These have been developed and tested over years. We only charge for the developer's hours, not for the developed modules.
6. **Free help from 5 to 15 years experts** when he is stuck or he requires experts' opinions - Saves time and ensures high quality. You have options to share your new ideas on web business or web marketing on your business with highly experienced people in the industry at no extra cost
7. **Minimum possible rates** in comparison to the quality of service we provide. It is very hard to find another developer company who will deliver you this quality at this price with a future support assurance.
8. You have **no risk if a developer leaves the job**. We give a replacement developer and also waive the 30% of the first month cost to let him warm up with your projects.
9. You can **cancel the deal anytime** in first 15 days. No hassle, we will refund the unused money deducting just money transfer fees.
10. We will **make 30% off** in the first month on any dedicated/part dedicated deal if you just complete two month with the new developer.
