

## Website Maintenance Services

Just developing a website is not the end of the story. This is actually the beginning. To understand the importance of hosting and maintenance you must know the life cycle of a web application first.

Here is the full life cycle of a successful Website / Web Application

1. **Register a domain** to host a website / web application. This is an ongoing cost renewable yearly.
2. **Develop the website / Web App** by a Web Development Company. Upload it on the hosting account. This is a onetime cost.
3. **Host the website / Web application** on a web-server to make it available to public via internet. This is an ongoing cost renewable monthly / yearly.
4. **Maintain the website / web application**. This is an ongoing process. The maintenance work includes - add / modify the website to meet the changing business requirements, take care of security and data backups.
5. **Market the website/application** through SEO and paid marketing techniques. This is an ongoing process with some extra work at the start.

If you don't maintain your website, soon it will be outdated. Your basic purpose will not be fulfilled. New tech issues may also crop up due to changes for various reasons like web server changes, security hacks, data loss etc. So there is no point of making a website if you don't maintain it.

We can take all the hassles for a nominal cost.

## Tasks Included in Maintaining a Website

1. Routine Monitoring of the website, database and web hosting account on an agreed schedule.  
Fix an error that has been cropped due to any external reason
2. Periodic data backup in a 3rd party server
3. Modification of an existing feature and addition of new feature
4. Move the data in the new server in case server changes
5. Provide tech info to people connected to the web application on your behalf. It may be a website user, a SEO guy or anyone related to website.
6. Routine work that requires server administration skills using ssh
7. Anything tech work related to your website

## Integrated Hosting Services

We offer integrated hosting services to host our developed sites in our dedicated / VPS server with our maintenance deal. Monthly maintenance tasks are often related to the hosting servers and so if you host in our servers, the total maintenance work will be easier and we may be in a position to offer better deal. You also do not have to bother about managing a hosting account with someone else. You can avoid all the regular hassles and concentrate only on your business.

## Which Hiring Model to Choose?

If you have a big website to maintain, has some urgent works for a developer almost every day, you should go for **Full Dedicated Hiring Model**. You should prefer to hire the same developer who has developed the website.

If your website is not too big and you do not have works-to-do for a dedicated developer there is no point to hire a dedicated developer. But you have some works every month to be done with priority, and you do not want a new developer every time to work on your project, you should go for a **Part Dedicated Developer Hiring Model**. We will most likely assign the same developer who has worked with your project in the past.

If your website is not that much serious, you can afford some delay in making the change and you do not bother whether it is being done by the same developer or by a different developer, you should go for **Usage Based Hiring Model**.

## What does it Cost?

Cost for Full Dedicated Hiring

Cost for Part Dedicated Hiring

## Which Hiring Model to Use?

SL	Type of projects / tasks	Suggested-Model
1.	Small / Large Websites with ready modules	Project Based
2.	Large New Websites with some custom modules	Virtual Dedicated
3.	Downloadable / Hosted Web Application Development	Virtual Dedicated
4.	Android & iPhone Development	Project Based
5.	Maintenance of a large website / web application that requires regular and urgent changes/ fixing	Full Dedicated
6.	Maintenance of a medium sized website that requires frequent and urgent changes	Part Dedicated
7.	Maintenance of a small / medium sized website that requires small changes but not too urgent	Usage Based

8.	New feature development for a RP developed site of more than 10 hours estimate (If no dedicated developer is there)	Project Based
9	Managing multiple new projects and maintaining changes in the existing projects (required by an IT company)	Dedicated Team

## How to get it done?

1. Contact us showing your interest. Tell us as more as possible about your requirement. If required have an online discussion through skype / gtalk.
2. We will give a fixed cost estimate if you can provide us a fixed requirement. If you give a rough requirement, we will give a ball park figure. We can write a formal requirement for you at a separate cost.
3. We agree on a price, payment schedule, hiring model, time etc.
4. We start developing the website/app in the agreed way and you pay as per agreed schedule. We take all the trouble to define, analyze, design, develop and test the application. Here is the full website app development process using RP framework.
5. You check the progress on each step and give rectification suggestion whenever required.
6. When the application development is complete and it has passed our quality testing you check it finally
7. We setup it at client server and keep a watch for few days

## Why Hire From Us?

There are solid reasons in its favour. Here are some of those

1. We **guarantee quality coding**. Any new project code developed by our developers will contain architecture based, modular, convention maintained, non redundant and future proof (easy to add new features and modify and existing feature) codes and database.
2. We will arrange for a **free pre-delivery quality review** for any application development developed by our developers - it removes the chances of common errors generally ignored by developers
3. We provide **personalised service**. We eat that much we can chew. Because we always deliver more than you pay. So clients stay with us for years.

4. **100% assurance for future support.** We will provide support for any project done by our developers. We will not run away. We may quarrel with you on any dispute but we will never be dishonest with you.
5. You get RP ready modules and library codes just free and have **lifetime licence to use, edit on any number of domains.** These have been developed and tested over years. We only charge for the developer's hours, not for the developed modules.
6. **Free help from 5 to 15 years experts** when he is stuck or he requires experts' opinions - Saves time and ensures high quality. You have options to share your new ideas on web business or web marketing on your business with highly experienced people in the industry at no extra cost
7. **Minimum possible rates** in comparison to the quality of service we provide. It is very hard to find another developer company who will deliver you this quality at this price with a future support assurance.
8. You have **no risk if a developer leaves the job.** We give a replacement developer and also waive the 30% of the first month cost to let him warm up with your projects.
9. You can **cancel the deal anytime** in first 15 days. No hassle, we will refund the unused money deducting just money transfer fees.
10. We will **make 30% off** in the first month on any dedicated/part dedicated deal if you just complete two month with the new developer.
