

Virtual Dedicated Hiring

In Virtual Dedicated Hiring you hire 160 hours of several types of resources for developing your project. Someone is always working on your project on a dedicated basis. You can contact him anytime. Unlike fixed cost hiring, you have the full control on the project manager, developer, tester when they work on your project.

It is the **Ideal Hiring Model** for developing a **New Custom Web Application**. Here is why?

Why Virtual Dedicated Hiring?

Developing a new custom, concept based web application requires many experts. You need at least an analyst cum PM, a developer, a web designer and a tester. Here is the contribution table.

Who Contributes How Much?

Sl.	Roles /skill types	Contribution to Total Work (Approx)	Experience level (Years)
1	System Analyst / Project Design / Solutions Provider / Project Mgt	30% to 35%	5-15 years
2	Graphics Template Designer (to design the main templates)	5% to 8%	3-8 years
3	HTML designer / Programmer / Unit Tester / Bug Fixer / tester	60% to 65%	2-5 years

To save cost, many people hires just a developer and compromises with the quality of the system.

The best solution is to hire all dedicated resources. But 40% to 70% of your resources may go unused. You may not afford it for a small project.

Of course, you could go for a fixed cost quotation method. But you will need to define your project before estimation is done and you may not be allowed to make changes in the core logic. But for concept based project your requirement doc will evolve over time in the early phase of development, you never know it unless you have moved ahead. So if you go for fixed cost basis, 90% chance is that you will end up with a wrong system. And simply all your money will go in waste.

Virtual Dedicated Hiring is a solution. You get all the experts when you need and you have control on your project requirement. And at the same time you do not hire all these experts on a dedicated

basis.

When to Hire a Virtual Dedicated Developer?

Followings are the situations when you should hire a virtual dedicated developer

1. When you are developing a new concept based web application
2. When your custom website is going to be different than others.
3. When you want to full control on the developers to yeild high quality output

How a Virtual Dedicated Developer Works?

1. We have a set of intelligent, well qualified and experienced PHP/MySQL developers who have worked in different PHP/MySQL projects. They are full time employee of RP and work from our Kolkata office normally works during: 10 AM to 7-30 PM.
2. You hire a Virtual Dedicated Developer resource from us. Basically you are hiring 160 hours a month of a team of resources till the project ends.
3. We will select a team for your project. You can also be part of this process. We will select the project manager and the developer. We will use the designer and tester on availability basis.
4. In the initial stage of project definition, analysis and design phase system analyst and designer will work. In the development phase the role of the developer will be more. They will work when required.
5. You will always get someone working on your project dedicatedly. But ideally in a month, they will work for 160 hours (NET) in total for your projects. These 160 hours includes any work with your project, but does not include any other works.
6. If in a month they work more than committed hours those will be adjusted next month. However, idle hours due to dependency from your side will not be carried forward to next month.
7. You will pay a fixed hiring rate of 160 hours for a month, irrespective of who has worked on your project.
8. Once the project is completed you can stop this virtual dedicated hiring and switch to part time dedicated or assignment based hiring model.
9. In this way, you use the right resource for doing the right task on a dedicated basis, again not hiring a full team on dedicated basis

Why Hire From Us?

- **Web Development since 1999**

We are in web development since 1999. In 2004 we developed a PHP MVC framework. Worked on almost all popular web technologies. We implemented many innovative ideas to maximize the client's revenue.

- **Reliable - In-house with no Newbies**

We have a dedicated in-house team of 30+ developers. 80% of them are 6+ years experience. 6 of them are 14+ years of experience. Only experienced developers and experts will work on your projects.

- **Complete Solution - Concept to Cash**

We have six 15+ years of experienced experts who will help to add value at different points of the software development life cycle. Execution will be done by experienced developers and technology experts.

- **Built-in-Quality through Lean Practices**

You can't turn a MI phone into an iPhone, once it is built. Because adding qualities as in iPhone requires to be built-in. We have quality checks on every step of the value stream starting right from the code editor.

- **Expertise in Latest Technologies**

We are currently focused on the latest tools, technologies, programming languages, frameworks and microservices architectures for developing web, cloud, desktop and mobile apps.

- **Use of Worldclass Agile Tools**

Only programming technologies do not help. We set up our development pipelines with DevOps tools like Jira, GIT, Dockers, Kubernetes and automated testing tools to deliver world-class quality in minimum time.

- **Super Service at India Price**

With the help of experienced and trained resources, 21 years of software development experience, hard work and professional honesty, we provide super service. And still at India

Price, as we manage everything from India.

• History of Serving in the Long Term

We provide future support. Even if you come back with a small change. **Clients stay with for years.** And in fact employees too. The main reason behind this is we really care about our clients and employees.
