Details_team_developer

Education	Bachelor/Master in technology (B Tech/M. tech) or similar degree in computer sciences (BCA/MCA)
Experiences	At least 2 years of working experience in developing professional websites and web application development
Basic Role	1. Will work as per project manager's instruction / SRS 2. Will do all required coding works for developing a typical website/web application (CMS, gallery, shopping cart, membership websites) as per well defined SRS 3. Can work on a complex live site under the guidance of a project manager
Quality Control Skill	Has ability to deliver convention maintained, object oriented, non-redundant architecture based code using Drupal/RP framework which will be easy for future maintenance.
Programming Tools	PHP / JavaScript / HTML / XML / JQUERY / AJAX / CSS, MySQL/SQL on RP/Drupal and other major frameworks
Web Design Skill	Can manipulate images using Photoshop and convert PSD template to HTML without requiring another designer.
System Design Skill	Has basic understanding of database structure, db design and MySQL databases. Can do system analysis and design for add-on modules of an existing application or popular cms/cart websites with little help from analyst. But for a serious project the system design must be done by a system designer.
Project Mgt Skill	Has basic understanding of SDLC and work as per PM instruction
