

How_dedicated_developer_works

We recruit intelligent, well qualified and experienced PHP/MySQL developers and let them work under quality oriented strict supervision. They become available for hiring when they ensure delivering quality works. Here how it works.

1. You hire a full time developer (or project manager) just paying a 15 days charge in advance.
2. We provide all web development amenities. We even provide our code library, modules, and framework free for him to use. These have been built and tested in last 13 years.
3. The developer will work only on your projects and will be always available on skype/chat during the working hours. You can contact them any time, during the working hours. If he is stuck or need some expert help, he has option to consult other expert developers who you have not hired.
4. You get the non development works (template design, data entry etc) by other resources on assignment basis. Your dedicated developer can manage it on your behalf.
5. He manage a daily log and enter what hours have been spent on what tasks. You can check his works any time.
6. In case a developer has become ill or left the job or you are not satisfied with his works, we will arrange a replacement developer. You can stop him with a 15 days notice.
7. We will be available for future support, after years, even for a 1 hour job.

In short, it is just like your own developer at your office. Except he sits behind the internet, not behind the wall. Additionally you do not take any technical and HR hassles.
