

Why Hire a Dedicated Developer?

There are 4 main reasons.

1. Low Cost - If you are from India, you may not have too much cost advantage, but can avoid hassles. But if you are from a country from Europe or from America, I can bet, you will get a better developer with us at an approximate 1/5th cost (or even less) in comparison to a local developer.
2. No Hassles - Of course, you can hire a local developer and accommodate him in your office. But you need additional table space, computer, and all web development amenities for him along with the usual hassles of recruitment, training, payroll, and regular supervision. With online dedicated developers with us, we take all these hassles. You just concentrate on your business.
3. Full Control - You always have the option to get things done on a fixed cost basis, but you will lack the control. You have to compromise with your priority, freedom to change, and freedom to communicate with the developer. You need to define every work every time and get involved with the cycle until it is done. But your involvement will be minimum for a dedicated developer.
4. Fulltime Technology Consultant - A dedicated PHP developer will be like your other employee. He/she will not only work as a developer but as your technology consultant. This is highly recommended for the continual improvement of your business. The 5th point of LEAN product development technique and 3rd point of DevOps framework. You can never expect it from fixed cost hiring or part-time hiring.
