

Testimonials

We have used Remote Programmer for last 77 months (as on March 2014) and have always been impressed by the quality of the service they provide. We have a fairly complex website which requires a lot of work on an ongoing basis so we opted to use dedicated resources from Remote Programmer because they are such great value for money. This approach means that we have full control of the programmers working for us which we find really useful.

All of the people we have worked with at Remote Programmer have had great technical skills. This was the most important thing for us as we needed experts who can work quickly and give their own expert input into our solutions.

Lutfal and Champa and their team (Remote Programmer) in Kolkata have been working with me since 2003.

Their first project was a pure development project: to rewrite a large ASP/MS-SQL dating site in PHP/MySQL. The difficulty was to transfer the data of 50,000 users from one platform to the other. I had made many enquiries with negative responses before Lutfal said his team could do it. Indeed they did - to my great relief.

I personally went to India to visit Lutfal and his team in 2007 to start off our project and they made me feel very welcome. I was impressed by their set-up and professionalism. I would highly recommend Remote Programmer to anyone.

Martin J Smith

From insightfulness to exquisiteness, RP proved to be an excellent partner on all aspects. Flexible work schemes, dedicated developers plus an advisory role indirectly. I have worked with RP for the last year on a number of projects with diversity in requirements and technology used. I have been very satisfied with them and I urge others to benefit from their capabilities
