Personalised SEO Services

We provide personalized SEO services for your site. This SEO team is led by one of our director who is in the field for last 10 years. We will give a comprehensive solution for your website that will help your site to rank at the top of the search engines.

No two websites are same in the world. The SEO strategy can't be the same for two serious websites. Packaged SEO services are fine for a start up website. But it is often risky for a moneymaking website. Because these are normally done by fresh people who often do mistakes that do more harms than benefits. They often use software that is compatible with old Google algorithm. They often submit a link at a link farm which has been penalized by Google. They often put to many keywords on a page that makes it a spam.

How do we do it - The SEO Process

- Analyze your website layout, page structure and your business
- Formulate a comprehensive solution as per budget and as per latest SE algorithm. The solution may contain hiring 3rd party expert services too.
- Implement the plan over a period of time. The plan normally includes following

  o   Keyword research
  o   Creation of title and Meta tags
  o   HTML cleanup
  o   Meta Tag Optimization (Title, Description, Keyword tags)
  o   Image Alt Tag optimization
  o   HTML optimization in the content headlines and links
  o   Content Optimization.
  o   Suggestion for Internal link structure.
  o   Creating the right robots.txt
  o   Creation of sitemap.xml
  o   Submission to Google and Yahoo sitemaps
  o   Submission to white listed directories manually
  o   Posting of articles & blogs
  o   Account creation in social networking sites
  o   Activities in Social Networking Sites
  o   Regular maintenance
  o   Regular Monitoring & Reporting
  o   React as per feedback and reports

Normally it takes at least 6 months to take effect for a new site SEO. However for an old site the effect are likely to be quicker.
